

# Make it yours!

Our products tailored to your requirements.

**SARSTEDT**

You can customize SARSTEDT products according to your requirements.

### One-of-a-kind service – a variety of options

Product customization has gained significance in recent years and is an important branding trend. Internal processes can also be improved considerably through customized products.

You know SARSTEDT as a leading manufacturer of high-quality consumables and a solution provider for science and medicine. **Beyond our established product range, we offer you a wide variety of options for tailoring SARSTEDT consumables to your requirements: custom labels, different colors or packaging options, higher purity grade, dosing or filling, etc.**

We are also the right partner for custom solutions. We support you in defining your customer-specific product. Analysis, development and production – from concept to production readiness – your individual product for your very specific requirements. You face a challenge – we find the solution.

We put together a team of experts who work closely with you to develop solutions for your particular requirements. No matter what sector you are in or what challenges you face, we have the technology and experience to develop the perfect customized solution for your company.

Contact us to discuss how we can meet your specific requirements.

**We will find the ideal solution for you!**

Discover the possibilities!

The right solution  
can be so easy.  
Success stories from  
our customers:

### Custom product solution

---

“To optimize internal processes, we had to replace a glass tube with a new product made of plastic. SARSTEDT supported us in development from beginning to end and we were able to successfully implement the new product.”

### Labels

---

“Our challenge was archiving our samples in tubes which have to be rapidly identified. For this purpose, SARSTEDT added our own barcode label to its products. The ideal solution for us.”

### Coding

---

“SARSTEDT pre-assembled its screw cap micro tubes for us with different colored caps. This means the filled products are individually labeled. It’s really helpful for us in our process.”

### Packaging

---

“We ship test kits, which include the SARSTEDT Minivette®. SARSTEDT manufactured customized packaging for us. This has given us enormous flexibility in the shipping process and strengthened our brand.”

### Purity

---

“For a specific analysis, we need reaction tubes with a particular purity grade. SARSTEDT certified the product as “Biosphere® plus” through special cleanroom conditions. Exactly what we need.”
